

## NOTICE

### OMIE and MIBGAS will launch an Iberian Inside Information Platform (IIP) for power and gas markets

Madrid, 12 Nov 2020

OMIE and MIBGAS are continuing to work on developing the Iberian Centralized Inside Information Platform. This platform will enable agents from the Iberian market in the electricity and gas sectors to comply with the obligations set forth in Article 4 of the EU's *Regulation on Wholesale Energy Market Integrity and Transparency*.

Tests on the Platform are scheduled to begin in December, both internally and with the agents who will use it. Once testing is complete, ACER will run the verification process. It will become operational on December 31, 2020.

As the following screenshot shows, the Platform is currently in the first phase of the agency's evaluation. It is expected to pass both phases as developments are completed.

As of today, as can be seen in the following screenshot, the Platform is in the 1st phase of evaluation by the Agency, and both phases are expected to be completed as developments are carried out.

Index	Platform Name	Phase 1	Phase 2	Status
11.	National Grid	no	yes	under evaluation, 1 <sup>st</sup> phase
12.	Nord Pool AS	yes	no	under evaluation, 1 <sup>st</sup> phase
13.	OMI, Polo Español S.A. (OMIE), MIBGAS S.A.	yes	yes	under evaluation, 1 <sup>st</sup> phase
14.	PRISMA European Capacity Platform GmbH	no	yes	1 <sup>st</sup> phase completed 2 <sup>nd</sup> phase under evaluation

When external testing on the Platform begins, agents who are interested in beginning to use the service must have submitted an "UMM"-format contact so that the system will allow them to complete the process.

Messages containing information from agents using this platform will be sent in the format established by ACER to ensure compliance with the regulation. It can be found at the following link ([Manual of Procedures](#)).

The Iberian Centralized Inside Information Platform will be free to use. The only requirement is signing the contract that sets forth the terms of use.
